MAYANK SINGH

Full Stack Developer | MERN Stack | React.js | Node.js | AWS
Bangalore, India | +91 7054767298 | mayanksingh88882@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with **3+ years** of experience building scalable, production-ready MERN stack applications. Skilled in React.js, Next.js, Node.js, Express.js, and MongoDB, with a strong track record of architecting RESTful APIs, optimizing application performance, and delivering measurable business impact. Growing DevOps expertise with GitLab, CI/CD pipelines, Docker, and AWS EC2 deployments. Experienced in end-to-end feature ownership — from database schema design to frontend implementation and deployment — with a focus on clean code, reusability, and Agile collaboration.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Redux, Context API, HTML5, CSS3, Tailwind CSS, Responsive UI Design

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Role-Based Access Control (RBAC)

Database: MongoDB (Schema Design, Aggregation Pipeline, Compound Indexing), Mongoose ODM

DevOps & Cloud: Git, GitHub, GitLab, Docker, CI/CD (GitHub Actions, GitLab CI, Vercel, Render), AWS EC2 Deployment, Postman, Cloudinary

Concepts: Performance Optimization, Lazy Loading, Memoization, Reusable Component Architecture, Agile

WORK EXPERIENCE

Software Developer — SPM Global Technologies *Aug 2023 – Present (Serving Notice Period)*

- Led end-to-end development of **DealDox**, a multi-module enterprise platform covering survey management, pricing workflows, and multi-level approval matrix systems using React.js, Node.js, and MongoDB.
- Architected **15+ RESTful APIs** with Node.js/Express.js, reducing average API response time by **~30%** through query optimization and caching.
- Engineered a dynamic approval matrix workflow automating multi-level routing, cutting turnaround time by **~40%**; built **20+ modular, reusable React.js UI components** that speed up frontend development.
- Implemented JWT-based authentication and RBAC securing workflows for **100+ users** across multiple roles.
- Optimized performance via lazy loading, memoization (useMemo, useCallback), and paginated APIs for faster page loads.
- Designed MongoDB schemas with aggregation pipelines and compound indexing to significantly reduce query execution time.
- Mentored **2 junior developers** via code reviews and pair programming; managed CI/CD pipelines via GitHub and Render/Vercel.

Full Stack Development Intern — JSpiders *Sep 2022 – Jul 2023*

- Developed and integrated **10+ responsive React.js UI components** for an internal e-commerce platform with mobile-first design.
- Built RESTful APIs using Node.js and Express.js for product listing and user management; designed MongoDB schemas with CRUD validation.
- Collaborated in a 4-member full-stack team using Git/GitHub, participating in code reviews and Agile sprint planning.

PROJECTS

Portfolio Builder Platform

React.js · Node.js · Express.js · MongoDB · Tailwind CSS

- Architected a full MERN SaaS-style app enabling students to create and publish professional portfolios with pre-built templates, real-time content editing, and dynamic routing.
- Implemented JWT auth, portfolio management dashboard, Cloudinary media uploads, and a scalable REST API layer for user profiles and template configuration.

AI Car Marketplace

React.js · Node.js · Express.js · MongoDB

- Full-stack marketplace with AI-based recommendations, dynamic filtering by make/model/price, and booking management.
- REST APIs for listings, auth, and appointments; optimized performance via pagination and indexed MongoDB queries.

CI/CD Pipeline & Cloud Deployment

GitLab CI/CD · Docker · AWS EC2

- Set up GitLab CI/CD pipelines to automate build, test, and deployment stages; deployed and configured apps on AWS EC2 with server setup and release management.

EDUCATION

B.Tech — Madhu Vachaspati Institute of Engineering & Technology (AKTU) | 2015 – 2019
